Protect what matters. Drive what's next in mission advantage.

SAP NS2

SAP National Security Services

SAP National Security Services (SAP NS2®) is an independent, U.S. subsidiary of SAP that delivers SAP solutions and AI capabilities exclusively with U.S. citizens operating on U.S. soil. As a CMMC Level 2 certified organization, SAP NS2 is dedicated to supporting customers across the U.S. Federal Government, Department of War, Defense Industrial Base, and Intelligence Community.

The SAP NS2 Government Cloud is aligned with ITAR, GovRAMP, FedRAMP, and DISA Impact Levels. With capabilities spanning unclassified, classified, Secret, and Top Secret levels, we ensure control, accountability, and protection for our customer's mission-critical data.

By bridging the gap between security and innovation, SAP NS2 empowers agencies to drive efficiency, operational performance, and modernization without compromising trust.

- SAP Fieldglass

Enterprise security capabilities

- Centralized monitoring
- Continuous integration / continuous delivery
- Security information and event management
- Centralized anti-malware
- Continuous web application scanning
- Centralized vulnerability scanning
- Centralized intrusion detection system
- Centralized log management

Powered by SAP. Secured by SAP NS2.

SAP NS2 combines modern cloud and AI capabilities with extensive practices dedicated to **data security, data access, and data residency.** The innovation, functionality, and services meet the same standards as SAP commercial, but SAP NS2 brings extended value regarding how solutions are protected and managed within the U.S.

U.S. workforce operating entirely on U.S. soil. The SAP NS2 workforce is comprised solely of U.S. citizens, located on U.S. soil. Our security model provides in-country support across all touch points and deployment on local, government-attested cloud infrastructure. Agencies can run combat operations and prevent bad actors from accessing data across critical lines of business.

Compliance to government and industry-specific regulations. SAP NS2 ensures all resources, data, and internal operations comply with U.S. regulations to safeguard operations. Adopt solutions that comply with:

- NIST SP 800-53 Rev 5
- International Traffic in Arms Regulations (ITAR)
- Export Administration Regulations (EAR)
- ISO 27001, 27017, 27018
- SOC I Type II, SOC II Type II
- FedRAMP®
- FedRAMP+ Impact Level 4*
- FedRAMP+ Impact Level 5*

SAP expertise paired with decades of security knowledge. SAP NS2 provides a team of dedicated, U.S.-based, and vetted personnel that are there to support your business objectives. Through deep industry and regional compliance knowledge, SAP NS2 experts support integration with SAP's broader secure cloud modernization strategy, including business AI and mission-focused digital transformation initiatives.

**Not all solutions across the SAP NS2 Government Cloud are FedRAMP+ IL4 or FedRAMP+ IL5 certified. Confirm compliance levels with your SAP NS2 representative.*

Cloud and AI for security-sensitive agencies

Find the solutions you need to transform your processes, improve efficiency, and meet your mission while complying with U.S. regulatory requirements.

100% support from trusted U.S. citizens, isolated on U.S. soil, within secure regions.

Successful innovation for defense agencies

When it comes to digital transformation, defense agencies carry out mission-critical operations that protect the livelihood of citizens, address political unrest, and protect the security of our nation. They need cloud-based solutions that support supply chain resilience, security concerns, and modern infrastructure. SAP NS2 provides the solutions to help meet and exceed these challenges so customers can find success.

Accelerated innovation timelines with minimal risk

SAP NS2's adherence to CMMC and DISA Impact Levels aligns with the necessary defense mandates to fast-track commercial deployments. Pre-certified alignment with FedRAMP, ITAR, and NIST standards ensures customers stay compliant from adoption to deployment.

Solutions that promote military readiness

SAP NS2 Government Cloud solutions connect siloed processes, analyze data across lines of business, and provide a full-picture view to help make accurate, real-time decisions. Agencies can accurately deploy, control, and maintain their mission-critical supply chain through innovative enterprise resource planning and digital supply chain solutions.

Enable trusted AI

Bring AI into business processes with governance, transparency, and enterprise controls built into the platform. SAP NS2's flexible digital AI foundation allows agencies to adapt to evolving policies, mission requirements, and emerging technologies.

Replace aging infrastructure at your pace

Choose the solutions that best align to mission priorities and implement them in a phased approach. New capabilities can be introduced incrementally, while integrating with existing enterprise investments. Agencies no longer need to retrofit legacy systems with modern solutions.

Governed, simplified, and mission-ready

How SAP NS2 supports defense agencies

As defense agencies navigate through institutional, regulatory, and budgetary obstacles, SAP NS2 provides a mission-ready, phased, and flexible approach to innovation. Through the SAP NS2 Government Cloud, we provide an avenue to adopt innovation without compromising security. We strictly control how our cloud portfolio is governed, where it resides, and how data is secured.

This control empowers agencies to benefit from a portfolio that supports all lines of business. Our dedication to data access, data residency, and data security ensures customers can future proof their operations while remaining protected by industry standards.

Key benefits

- Cloud solutions designed to support mission-critical workloads and protect controlled unclassified information (CUI)
- Deployment options with government-grade hyperscalers, such as AWS GovCloud, Azure Government, and Google Cloud Platform Assured Workloads
- All-in-one deployment model to reduce overhead and infrastructure costs, lower total cost of ownership (TCO), and provide quicker time to value
- 99.7 and 99.9 service level agreements (SLA) to reduce system downtime
