U.S. manufacturing organizations supported by SAP NS2 | PUBLIC

Protect what matters. Drive what's next in coordinated decision making.

SAP NS2

SAP National Security Services

SAP National Security Services (SAP NS2®) is an independent, U.S. subsidiary of SAP that delivers SAP solutions and AI capabilities exclusively with U.S. citizens operating on U.S. soil. As a CMMC Level 2 certified organization, SAP NS2 is dedicated to supporting customers across the U.S. Federal Government, Department of War, Defense Industrial Base, and Intelligence Community.

The SAP NS2 Government Cloud is aligned with ITAR, GovRAMP, FedRAMP, and DISA Impact Levels. With capabilities spanning unclassified, classified, Secret, and Top Secret levels, we ensure control, accountability, and protection for our customer's mission-critical data.

By bridging the gap between security and innovation, SAP NS2 empowers manufacturers to drive efficiency, operational performance, and modernization without compromising trust.

SAP's trusted enterprise applications and business

Enterprise resource planning
The foundation for manufacturing, contract execution, and project accounting.

- SAP S/4HANA Cloud Private Edition
- SAP Enterprise Portfolio and Project Management

AI platform
An enterprise AI foundation that brings together AI, data, process context, and governance.

- SAP Business Data Cloud
- SAP Analytics Cloud
- SAP HANA Cloud
- SAP Business Technology Platform
- SAP AI Core
- SAP AI Launchpad

Human capital management
Workforce management and payroll built to support all employees.

- SAP SuccessFactors
- SAP SuccessFactors Employee Central Payroll

Supply chain management
End-to-end supply chain visibility and control.

- SAP Business Network Supply Chain Collab
- SAP Business Network Planning Collaboration
- SAP Integrated Business Planning
- SAP Mobile Execution and Dynamic Forms

Finance and spend management
Streamlined acquisition and vendor management.

- SAP Ariba Procurement solutions
- SAP Fieldglass

Enterprise security capabilities

- Centralized monitoring
- Continuous integration / continuous delivery
- Security information and event management
- Centralized anti-malware
- Continuous web application scanning
- Centralized vulnerability scanning
- Centralized intrusion detection system
- Centralized log management

Powered by SAP. Secured by SAP NS2.

SAP NS2 combines SAP's enterprise applications, data, and AI capabilities with with extensive practices dedicated to **data security, data access, and data residency.** Whether complex manufacturing, supply chain operations, finance, or program execution, SAP NS2 helps defense contractors modernize critical business processes while supporting **CMMC obligations**, protecting **Controlled Unclassified Information (CUI)**, and addressing applicable regulatory requirements..

U.S. workforce operating entirely on U.S. soil. The SAP NS2 workforce is comprised solely of U.S. citizens, located on U.S. soil. Our security model provides in-country support across all touch points and deployment on local, government-attested cloud infrastructure. Organizations can run supply chain operations, mitigate risk of international data exposure, and prevent bad actors from accessing critical data.

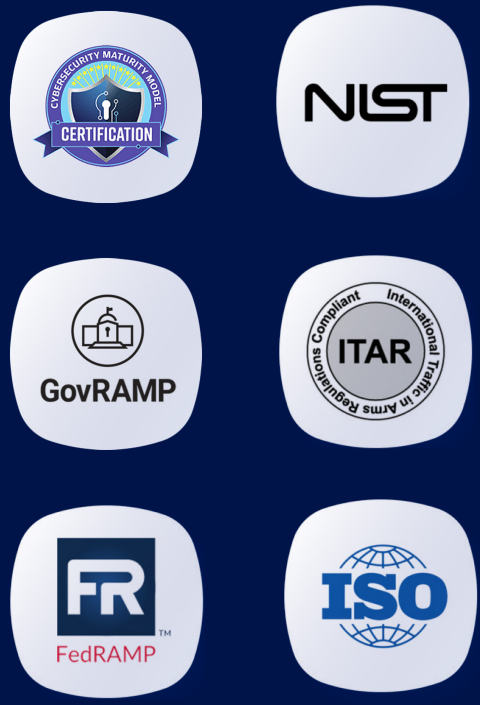
Compliance to government and industry-specific regulations. SAP NS2 ensures all resources, data, and internal operations comply with U.S. regulations to safeguard operations. Adopt solutions that comply with:

- FedRAMP®
- NIST SP 800-53 Rev 5
- DFARS 252.204-7012
- International Traffic in Arms Regulations (ITAR) / Export Administration Regulations (EAR)
- SOC I Type II, SOC II Type II
- HIPAA/GxP
- GovRAMP
- ISO 27001, 27017, 27018
- FedRAMP+ Impact Level 2
- CUI & ECI protections

SAP expertise paired with decades of security knowledge. SAP NS2 provides a team of dedicated, U.S.-based, and vetted personnel that are there to support your business objectives. Through deep industry and regional compliance knowledge, SAP NS2 experts support integration with SAP's broader secure cloud modernization strategy, including business AI and digital transformation initiatives.

Cloud and AI for security-sensitive manufacturers

Find the solutions you need to transform your processes, improve efficiency, and reduce fragmentation while complying with U.S. regulatory requirements.



100% support from trusted U.S. citizens, isolated on U.S. soil, within secure regions.

Achieving digital transformation for manufacturing

The manufacturing industry needs solutions that can address data fragmentation, improve disconnected legacy systems, and turn governance into a trust-builder rather than a bottleneck. SAP NS2 helps meet and exceed these challenges so customers can find success.

Accelerated innovation timelines with minimal risk

SAP NS2's FedRAMP-based infrastructure aligns with the necessary federal mandates to fast-track commercial deployments. Manufacturing organizations can adopt today's innovation with zero-trust architecture, strict isolation measures, and role-based access controls to remain protected against ransomware attacks.

Alignment with highly regulated government organizations

Manufacturing customers can run on architecture trusted by top-tier defense industrial base (DIB) contractors, due to SAP NS2's expansive customer base. SAP NS2 brings decades of expertise in supporting mission-critical government agencies, demonstrating the maturity required to keep critical systems up and running.

Reduce complexity between legacy and modern systems

Evolve legacy processes in a phased approach, weave together siloed systems, leverage intelligent technologies, and connect real-world data from one plant to another to create value for the end users that rely on you.

Gain enterprise-level visibility across manufacturing networks

Use modern data management solutions to unify fragmented data across siloed systems, adopt consistent data models, and create seamless integration between MES/ERP platforms. SAP NS2 creates a data foundation capable of supporting modern AI pipelines and cloud-native architectures.

Integrated, regulated, and auditable

How SAP NS2 supports manufacturing organizations

Through the SAP NS2 Government Cloud, we provide manufacturing organizations an avenue to adopt innovation without compromising security. We strictly control how our cloud portfolio is governed, where it resides, and how data is secured.

This control empowers organizations to benefit from a portfolio that supports all lines of business. Our dedication to data access, data residency, and data security ensures customers can future proof their operations while remaining protected by industry standards.

Key benefits

- Cloud solutions designed to support mission-critical workloads and protect mission-critical data
- Deployment options with government-grade hyperscalers, such as AWS GovCloud, Azure Government, and Google Cloud Platform Assured Workloads
- All-in-one deployment model to reduce overhead and infrastructure costs, lower total cost of ownership (TCO), and provide quicker time to value
- 99.7 and 99.9 service level agreements (SLA) to reduce system downtime
