Cloud Intelligence Enterprise Environment

SAP NS2 Federally Regulated Cloud Environment: The Secure Cloud Dedicated to Federal and Government Entities

Summary

SAP National Security Services (SAP NS2®) was founded to help protect and secure the mission critical operations of highly regulated organizations. As the U.S. sovereign cloud deployment arm of SAP, we provide the unique capability for federal and government entities to run market leading SAP applications without having to sacrifice security, innovation, or cost. Our team of local, credentialed experts provide the highest levels of security and compliance, deliver world class innovation, and protect critical data across all applications enterprise-wide.

We host and deploy SAP solutions within three secure cloud environments: Commercially Regulated Environment (CRE), **Cloud Intelligence Enterprise (CIE)**, and Department of Defense (DoD). CIE was built specifically for our customers within the federal and government space, and it encompasses all of your needs concerning security and cloud functionality. Deploying your SAP cloud portfolio within SAP NS2's CIE environment gets you to the cloud quickly, safely, and effectively.

Benefits of CIE

- Commercial innovation protected with federally mandated U.S. regulations
- Operations isolated to the U.S. – including data, applications, and infrastructure
- End-to-end support model provided through ongoing management of your cloud applications and security framework
- All-in-one deployment model reduces overhead and infrastructure costs, lowers total cost of ownership (TCO), and provides quicker time to value
- 99.5 and 99.9 service level agreements (SLA) reduce system downtime

CIE Security Compliance

- National Institute of Standards and Technology (NIST) 800-53 Rev 5
- International Traffic and Arms (ITAR) / Export Administration Regulations (EAR)
- FedRAMP® Authorized
- SOC I Type II

Targeted Industries for CIE

- Federal Government Agencies
- Tribal Organizations
- State/Local Governments

Available SAP Cloud Solutions within CIE

- SAP S/4HANA Cloud, private edition
- SAP Analytics Cloud
- SAP Business Technology Platform
- SAP SuccessFactors Human Capital Management

SAP NS2's Cloud Intelligent Enterprise (CIE)

hosts and deploys SAP's commercial cloud solutions with enhanced security controls to address the specific needs of U.S. federal entities. The CIE environment was built with an emphasis on safeguarding federal and confidential information that could impact citizens well being. Our FedRAMP authorization assures that our cybersecurity model and cloud services are in accordance with the regulations put in place by U.S. federal government. In addition, our team of dedicated U.S. personnel support your SAP cloud landscape with deep industry knowledge.

The CIE environment is protected with continuous monitoring, vulnerability scanning, and intrusion detection to ensure your data stays protected under an automated security

model. All solutions hosted within CIE are deployed on U.S.-based infrastructure dedicated to handling federal workloads. Our infrastructure providers adhere to the data residency and data access regulations put in place by the U.S. government.

CIE empowers you to become an intelligent, sustainable enterprise by securely bringing together SAP's comprehensive portfolio of solutions and technology to support your business processes.

Learn more

Ready to begin your journey to the cloud? Learn more about CIE deployment options and how you can adopt SAP innovation with industry-specific security at www.sapns2.com.

Federal entities need a cloud service provider that can support the entirety of their cloud landscape – including infrastructure, ongoing security controls, and solution functionality. SAP NS2's secure cloud environment ensures a **standardized security and operating model** for a reliant, trustworthy cloud landscape.
