Federal civilian agencies supported by SAP NS2 | PUBLIC

Protect what matters. Drive what's next in accelerating mission outcomes.

SAP NS2

SAP National Security Services

SAP National Security Services (SAP NS2®) is an independent, U.S. subsidiary of SAP that delivers SAP solutions and AI capabilities exclusively with U.S. citizens operating on U.S. soil. As a CMMC Level 2 certified organization, SAP NS2 is dedicated to supporting customers across the U.S. Federal Government, Department of War, Defense Industrial Base, and Intelligence Community.

The SAP NS2 Government Cloud is aligned with ITAR, GovRAMP, FedRAMP, and DISA Impact Levels. With capabilities spanning unclassified, classified, Secret, and Top Secret levels, we ensure control, accountability, and protection for our customer's mission-critical data.

By bridging the gap between security and innovation, SAP NS2 empowers agencies to drive efficiency, operational performance, and modernization without compromising trust.

- SAP Business Network
- SAP Integrated Business Planning
- SAP Mobile Execution and Dynamic Forms

Finance and spend management
Streamlined acquisition and vendor management.

- SAP Ariba Procurement solutions
- SAP Fieldglass

Powered by SAP. Secured by SAP NS2.

SAP NS2 combines modern cloud and AI capabilities with extensive practices dedicated to **data security, data access, and data residency.** The innovation, functionality, and services meet the same standards as SAP commercial, but SAP NS2 brings extended value regarding how solutions are protected and managed within the U.S.

U.S. workforce operating entirely on U.S. soil. The SAP NS2 workforce is comprised solely of U.S. citizens, located on U.S. soil. Our security model provides in-country support across all touch points and deployment on local, government-attested cloud infrastructure. Agencies can run core operations, mitigate risk of international data exposure, and prevent bad actors from accessing data across critical lines of business.

Compliance to government and industry-specific regulations. SAP NS2 ensures all resources, data, and internal operations comply with U.S. regulations to safeguard operations. Adopt solutions that comply with:

- NIST SP 800-53 Rev 5
- International Traffic in Arms Regulations (ITAR)
- Export Administration Regulations (EAR)
- ISO 27001, 27017, 27018
- SOC I Type II, SOC II Type II
- HIPAA
- GovRAMP
- FedRAMP®
- FedRAMP+ Impact Level 2
- CUI & ECI protections

SAP expertise paired with decades of security knowledge. SAP NS2 provides a team of dedicated, U.S.-based, and vetted personnel that are there to support your business objectives. Through deep industry and regional compliance knowledge, SAP NS2 experts support integration with SAP's broader secure cloud modernization strategy, including business AI and mission-focused digital transformation initiatives.

Cloud and AI for security-sensitive agencies

Find the solutions you need to transform your processes, improve efficiency, and meet your mission while complying with U.S. regulatory requirements.

100% support from trusted U.S. citizens, isolated on U.S. soil, within secure regions.

Successful innovation for federal civilian agencies

Federal civilian agencies need a cognitive, integrated, and intelligent enterprise while balancing strict federal budgets and addressing challenges of regional instability and asymmetric threats. SAP NS2 provides the solutions to help meet and exceed these challenges so customers can find success.

Accelerated innovation timelines with minimal risk

SAP NS2's FedRAMP-based infrastructure aligns with the necessary federal civilian mandates to fast-track commercial deployments. Pre-certified alignment with FedRAMP, ITAR, and NIST standards ensures agencies stay compliant from adoption to deployment.

Balance cost, innovation, and security

Adopt innovative cloud solutions and prioritize investments that reduce technical debt, improve efficiency, and deliver measurable mission outcomes. SAP NS2 provides intelligent cloud solutions in a subscription-based model to maximize solution value, while remaining cost conscious.

Enable trusted AI

Bring AI into business processes with governance, transparency, and enterprise controls built into the platform. SAP NS2's flexible digital AI foundation allows agencies to adapt to evolving policies, mission requirements, and emerging technologies.

Build a custom modernization roadmap

Choose the solutions and deployment models that best align to mission priorities instead of replacing everything at once. New capabilities can be introduced incrementally while integrating with existing enterprise investments.

Invested, innovative, and future-ready

How SAP NS2 supports federal civilian agencies

Federal agencies face different international threats and have unique compliance requirements surrounding their operations. Through the SAP NS2 Government Cloud, we provide an avenue to adopt innovation without compromising security. We strictly control how our cloud portfolio is governed, where it resides, and how data is secured.

This control empowers agencies to benefit from a portfolio that supports all lines of business. Our dedication to data access, data residency, and data security ensures federal civilian customers can future proof their operations while remaining protected by industry standards.

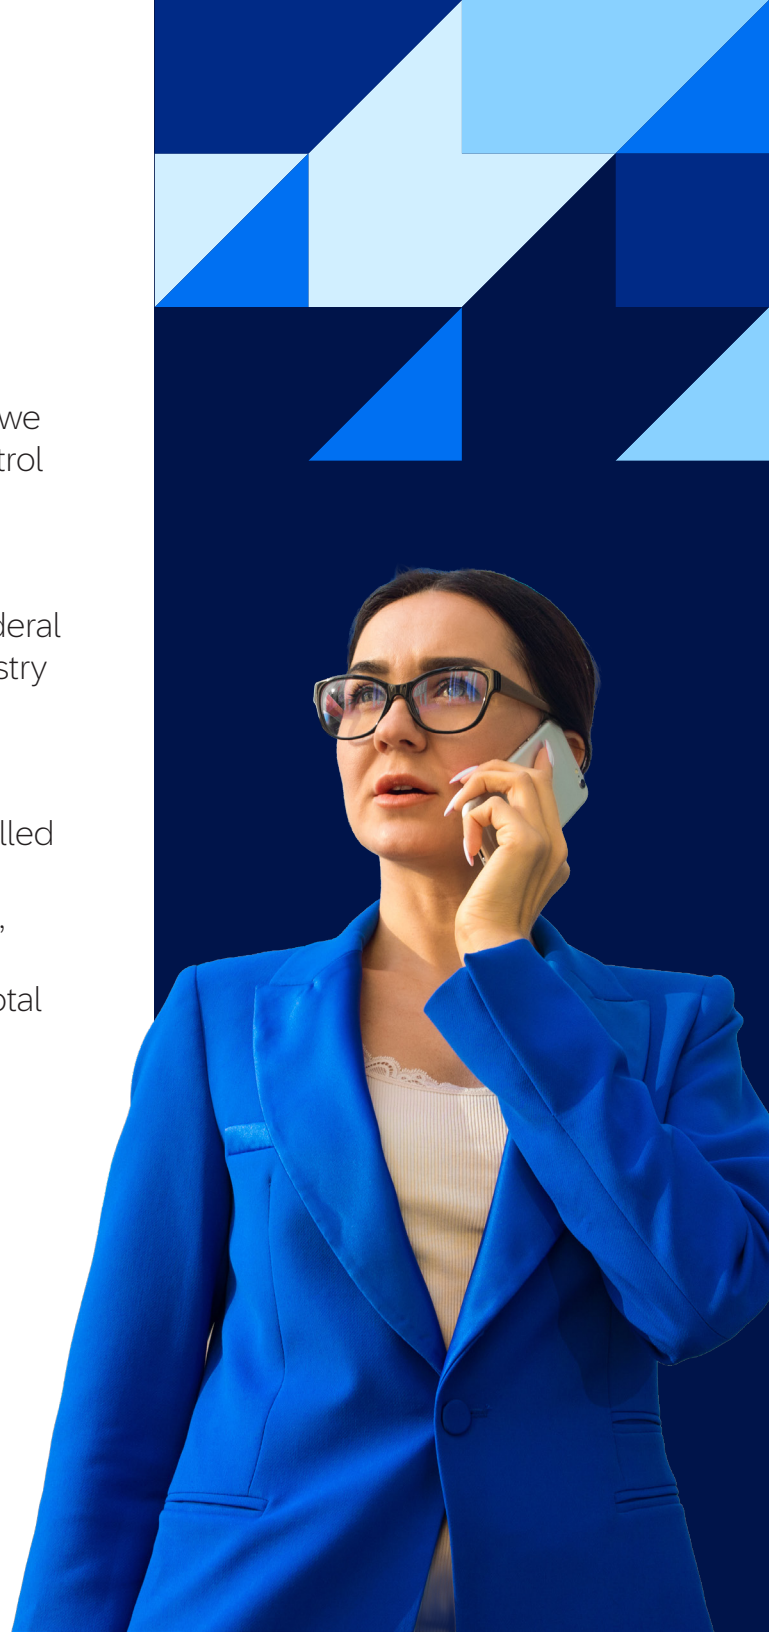

Key benefits

- Cloud solutions designed to support mission-critical workloads and protect controlled unclassified information (CUI)
- Deployment options with government-grade hyperscalers, such as AWS GovCloud, Azure Government, and Google Cloud Platform Assured Workloads
- All-in-one deployment model to reduce overhead and infrastructure costs, lower total cost of ownership (TCO), and provide quicker time to value
- 99.7 and 99.9 service level agreements (SLA) to reduce system downtime
