

Protect what matters. Drive what's next in supply chain and supplier collaboration.

SAP National Security Services

SAP National Security Services (SAP NS2®) is an independent, U.S. subsidiary of SAP that delivers SAP solutions and AI capabilities exclusively with U.S. citizens operating on U.S. soil. As a CMMC Level 2 certified organization, SAP NS2 is dedicated to supporting customers across the U.S. Federal Government, Department of War, Defense Industrial Base, and Intelligence Community.

The SAP NS2 Government Cloud is aligned with ITAR, GovRAMP, FedRAMP, and DISA Impact Levels. With capabilities spanning unclassified, classified, Secret, and Top Secret levels, we ensure control, accountability, and protection for our customer's mission-critical data.

By bridging the gap between security and innovation, SAP NS2 empowers agencies to drive efficiency, operational performance, and modernization without compromising trust.

SAP Business Network solution overview

Supply chain management: SAP Business Network

SAP Business Network solutions are cloud-based, collaboration offerings that modernize how procurement and supply chain processes are connected across organizations. They help build stronger supply chains, deliver on the customer promise, gain visibility into your supply chain, increase operational efficiency, and ensure compliance.

SAP Business Network for Supply Chain: Extends direct materials supply chain business processes between customers and their contractors and suppliers by providing real-time visibility to forecasts and commits, contract manufacturing finished goods production and raw material consumption, supplier-managed inventory, and quality notification and inspection processes.

SAP Business Network for Procurement: Enables the exchange of purchase orders, order confirmations, shipping notifications, goods receipts, and the electronic processing of invoices and credit memos between a customer and their contractors and suppliers.

SAP Business Network Asset Collaboration: Streamlines asset management by connecting operators, OEMs, and service providers. SAP Business Network Asset Collaboration boosts resiliency and transparency across the asset lifecycle with shared data and real-time coordination.

Highlighted benefits:

Local e-invoice compliance

Enable suppliers to meet local legal and tax needs through country-specific invoice formats, fields, e-signatures, and tax archiving.

Drive supply chain resiliency

Respond to disruption to prevent revenue loss and unforeseen costs due to stock-outs, shortages, stoppages, and fluctuations.

Enhance equipment effectiveness

Enable transparency on equipment failures and maintenance among your trading partners to achieve optimal equipment effectiveness.

Cloud innovation for security-sensitive organizations

Adopt SAP supply chain management solutions to gain visibility, centralize processes, and improve supply chain continuity all while complying with U.S. regulatory requirements.

100% support
from trusted U.S. citizens,
isolated on U.S. soil,
within secure U.S. regions.

Powered by SAP. Secured by SAP NS2.

SAP Business Network deployed through SAP NS2 combines supply chain management processes with extensive practices dedicated to **data security, data access, and data residency**. The innovation, functionality, and services meet the same standards as SAP commercial, but SAP NS2 brings extended value regarding how the solution is protected and managed within the U.S.

U.S. workforce operating entirely on U.S. soil. The SAP NS2 workforce is comprised of U.S. citizens, solely located on U.S. soil. Our security model provides in-country support across all touch points and deployment on local, government-attested cloud infrastructure. Organizations can connect with suppliers, mitigate risk of international data exposure, and prevent bad actors from accessing procurement data, such as supplier organization and bill-of-materials.

Compliance to government and industry-specific regulations. SAP NS2 ensures all resources, data, and internal operations comply with U.S. regulations to safeguard supplier collaboration and planning information. Adopt solutions that comply with National Institute of Standards and Technology (NIST) 800-53, International Traffic in Arms

Regulations (ITAR), FedRAMP®, and Defense Federal Acquisition Regulation Supplement (DFARS). We leverage tools such as advanced threat analytics, automated compliance validation, vulnerability scanning, intrusion detection, and continuous monitoring to ensure procurement processes stay protected under an automated security model.

SAP expertise paired with decades of security knowledge. SAP NS2 provides a team of dedicated, U.S.-based, and vetted personnel that are there to support your business objectives. Through deep industry and regional compliance knowledge, SAP NS2 experts support integration with SAP's broader secure cloud modernization strategy, including business AI and mission-focused digital transformation initiatives.

Collaborate with partners and securely transmit data.

SAP Business Network creates capabilities that benefit regulated industries and their ecosystem partners throughout the entire asset lifecycle. Customers are equipped with the procurement and supply chain solutions needed to help them securely operate across the extended enterprise.

Drive smarter, more resilient asset operations

Transform asset management with secure access to data, intelligent automation, and integrated business processes. Analyze critical operational information faster, make more informed decisions, and improve resilience and performance of mission-critical assets.

Adopt a secure, cloud-first foundation for regulated operations

Modernize with a cloud environment designed to balance innovation, security, and compliance. Enable secure collaboration across your organization and partner ecosystem while meeting the rigorous requirements of regulated industries.

Strengthen supplier network security with consistent governance

Protect sensitive data across your supplier ecosystem with security

controls aligned to U.S. standards. Maintain confidence in cross-organizational collaboration while reducing risk as your network expands globally.

Simplify supplier collaboration with connected operations

Unify supplier interactions through standardized processes and integrated systems that improve operational consistency and streamline the secure exchange of information.

Maximize asset performance with connected intelligence

Gain end-to-end visibility across the asset lifecycle to improve equipment reliability, optimize maintenance operations, reduce inventory and service costs, and minimize human error and compliance risks.

Connected, efficient, and compliant

Collaborate with trading partners and build stronger supply chains

SAP Business Network modernizes the way supply chains connect to help collaborate with suppliers, adjust and respond quickly to changing circumstances, and meet customer promises.

When deployed by SAP NS2 Government Cloud, customers gain access to the world's largest B2B trading partner platform, delivered by U.S. citizens on U.S. soil and designed to support the unique security and operational requirements of regulated organizations.

Expected outcomes

- ✦ Lower total cost of ownership and increased time to value through automated solution deployment and security management
- ✦ Secure collaboration across the network of OEMs, asset operators, and service providers
- ✦ U.S.-based cloud hosting to create a central asset repository without unnecessary global transmission of asset data
- ✦ Compliance to NIST 800-53 standards and ITAR to protect mission-critical data, such as asset location and usage
