Protect what matters. Drive what's next in contingent workforce management.

SAP National Security Services

SAP National Security Services (SAP NS2®) is an independent, U.S. subsidiary of SAP that delivers SAP solutions and AI capabilities exclusively with U.S. citizens operating on U.S. soil. As a CMMC Level 2 certified organization, SAP NS2 is dedicated to supporting customers across the U.S. Federal Government, Department of War, Defense Industrial Base, and Intelligence Community.

The SAP NS2 Government Cloud is aligned with ITAR, GovRAMP, FedRAMP, and DISA Impact Levels. With capabilities spanning unclassified, classified, Secret, and Top Secret levels, we ensure control, accountability, and protection for our customer's mission-critical data.

By bridging the gap between security and innovation, SAP NS2 empowers agencies to drive efficiency, operational performance, and modernization without compromising trust.

SAP Fieldglass solution overview

Spend management: SAP Fieldglass

SAP Fieldglass solutions are cloud-based, external workforce management software products designed to help organizations transform the external workforce into a versatile, value-driving catalyst for growth.

SAP Fieldglass Contingent Workforce Management: This solution is enhanced with intelligent insights, automated compliance alerts, and real time visibility into workforce risk indicators. It mitigates compliance risks, streamlines engagement processes, and increase visibility to drive cost savings and improve productivity.

SAP Fieldglass Services Procurement: This offering manages projects and services by orchestrating services engagements with automated workflows, performance intelligence, and embedded security controls. Large organizations can utilize SAP Fieldglass to simplify how external service providers are engaged, ensure compliance to safety and security policies, and measure the quality of services being delivered.

SAP Fieldglass Worker Profile Management: This head count tracking solution improves visibility into the external workforce. It consolidates visibility across the entire extended workforce, enabling organizations to comply with data governance and reporting standards, while providing onboarding, offboarding and reporting capabilities, and maintaining a standardized record of all external workers—from who they are, where they're working, and what materials they're assigned.

Highlighted benefits:

Integration support

Increase flexibility and reduce reliance on middleware with integration across SAP and non-SAP ERP systems.

AI innovations

Accelerate mission critical decision making through secure, AI-driven insights and workforce analytics.

Secure compliance

Reduce complexity through automated workforce compliance checks aligned to federal and industry standards.

Cloud innovation for security-sensitive organizations

Adopt SAP spend management solutions to streamline processes, improve efficiency, and achieve operational success all while complying with U.S. regulatory requirements.

CYBERSECURITY MATURITY MODEL CERTIFICATION

NIST

GovRAMP

ITAR International Traffic in Arms Regulations Compliant

FedRAMP

DISA

100% support from trusted U.S. citizens, isolated on U.S. soil, within secure U.S. regions.

Powered by SAP. Secured by SAP NS2.

The SAP Fieldglass solution deployed through SAP NS2 combines external workforce management with extensive practices dedicated to **data security, data access, and data residency**. The innovation, functionality, and services of SAP Fieldglass meet the same standards as SAP commercial, but SAP NS2 brings extended value regarding how the solution is protected and managed within the U.S.

U.S. workforce operating entirely on U.S. soil. The SAP NS2 workforce is comprised of U.S. citizens, solely located on U.S. soil. Organizations gain real-time, policy-driven control over their cloud operations and workforce. Our security model provides in-country support across all touch points and deployment on local, government-attested cloud infrastructure. This dramatically mitigates the risk of international data exposure and breaches to workforce operations.

Compliance to government and industry-specific regulations. SAP NS2 ensures all resources, data, and internal operations comply with U.S. regulations to safeguard employee PII and workforce information. Adopt a solution that complies with National Institute of Standards and Technology (NIST) 800-53, International Traffic in Arms Regulations (ITAR), FedRAMP®, and Defense Federal Acquisition Regulation Supplement (DFARS). We leverage tools such as advanced threat analytics, automated compliance validation, vulnerability scanning, intrusion detection, and continuous monitoring to ensure your data stays protected under an automated security model.

SAP expertise paired with decades of security knowledge. SAP NS2 provides a team of dedicated, U.S.-based, and vetted personnel that are there to support your business objectives. Through deep industry and regional compliance knowledge, SAP NS2 experts support integration with SAP's broader secure cloud modernization strategy, including business AI and mission-focused digital transformation initiatives.

Source, engage, and manage workers with complete control

Organizations are increasingly challenged by supply chain threats, skills shortages, and rising dependency on hybrid internal and external labor models. SAP Fieldglass deployed within the SAP NS2 ecosystem enables secure integrations with broader SAP Business AI and digital modernization roadmaps.

Securely manage your external workforce

Confidently onboard, manage, and offboard external workers with security built into every stage of the workforce lifecycle. Ensure only vetted personnel have access to critical systems while maintaining visibility and governance across your extended workforce.

Strengthen identity and access security

Apply Zero Trust principles and identity-based access controls to protect critical systems and sensitive data. Give external workers the access they need while maintaining control over who can access what and when.

Accelerate workforce readiness

Streamline onboarding and provisioning so external workers can become productive faster without compromising security or compliance. Enable your organization to scale confidently while reducing administrative complexity.

Stay ahead of evolving cyber threats

Protect mission-critical systems with security designed to defend against increasingly sophisticated cyber threats. Strengthen organizational resilience with proactive safeguards that help secure identities, applications, and sensitive data.

Enable secure innovation in regulated environments

Adopt new technologies and modern workforce models on a secure, compliant foundation. Support innovation and operational agility while meeting the stringent security requirements of highly regulated industries.

Automated, efficient, and trusted

Gain visibility and control across the entire external workforce landscape.
SAP Fieldglass provides organizations with the tools needed to source, engage, and manage external talent efficiently and securely while ensuring compliance across regional markets. With a streamlined and optimized external workforce management tool, you can plan with precision to reduce risk and costs.

When deployed by SAP NS2 Government Cloud, customers gain access to SAP solutions, delivered by U.S. citizens on U.S. soil and designed to support the unique security and operational requirements of regulated organizations. Get the right talent, at the right time, to every part of the business while maintaining compliance and controlling costs.

Expected outcomes

- Real-time, policy-driven control over cloud operations and workforce access
- Optimized spend with automated processes and real-time analytics
- Comprehensive view of the external workforce to adapt quickly to business needs
- Compliance with changing labor laws and security requirements
