SAP National Security Services

SAP National Security Services (SAP NS2®) is an independent, U.S. subsidiary of SAP that delivers SAP solutions and AI capabilities exclusively with U.S. citizens operating on U.S. soil. As a CMMC Level 2 certified organization, SAP NS2 is dedicated to supporting customers across the U.S. Federal Government, Department of War, Defense Industrial Base, and Intelligence Community.

The SAP NS2 Government Cloud is aligned with ITAR, GovRAMP, FedRAMP, and DISA Impact Levels. With capabilities spanning unclassified, classified, Secret, and Top Secret levels, we ensure control, accountability, and protection for our customer's mission-critical data.

By bridging the gap between security and innovation, SAP NS2 empowers agencies to drive efficiency, operational performance, and modernization without compromising trust.

SAP S/4HANA Cloud Private Edition solution overview

Cloud enterprise resource planning: SAP S/4HANA Cloud Private Edition

SAP S/4HANA Cloud Private Edition is a comprehensive enterprise resource planning (ERP) solution that helps organizations modernize core business processes while maintaining the flexibility, control, and security required for complex operations. The solution integrates **finance, supply chain, procurement, manufacturing, asset management, and other critical functions into a single, intelligent system.**

Designed for organizations with unique business requirements, SAP S/4HANA Cloud Private Edition enables customers to move to the cloud while preserving the ability to tailor processes and configurations to meet operational needs. The solution combines the innovation and scalability of the cloud with the flexibility of a private deployment model, helping organizations reduce complexity, improve efficiency, and accelerate digital transformation.

With embedded analytics, automation, and artificial intelligence capabilities, SAP S/4HANA Cloud Private Edition delivers **real-time visibility across the enterprise, empowering leaders to make informed decisions faster.** By connecting people, processes, and data across the organization, the solution helps drive operational excellence, increase resilience, and support mission-critical objectives.

SAP S/4HANA Cloud Private Edition provides a **modern ERP foundation that supports compliance, security, and governance requirements** while enabling continuous innovation and future-ready business operations.

Highlighted innovations:

Supply chain

Support in-house repair (3XK) processes with warehouse management functionality.

R&D engineering

Enable advanced variant configuration with downloads of bills of materials (BOMs).

Sales

Use an app to display and edit pricing elements in preliminary billing documents.

Cloud innovation for security-sensitive organizations

Adopt SAP ERP solutions to streamline processes, improve efficiency, and achieve operational success all while complying with U.S. regulatory requirements.

100% support
from trusted U.S. citizens,
isolated on U.S. soil,
within secure regions.

Powered by SAP. Secured by SAP NS2.

SAP S/4HANA Cloud Private Edition deployed through SAP NS2 combines enterprise resource planning with extensive practices dedicated to **data security, data access, and data residency**. The innovation, functionality, and services meet the same standards as SAP commercial, but SAP NS2 brings extended value regarding how the solution is protected and managed within the U.S.

U.S. workforce operating entirely

on U.S. soil. The SAP NS2 workforce is comprised of U.S. citizens, solely located on U.S. soil. Our security model provides in-country support across all touch points and deployment on local, government-attested cloud infrastructure. Organizations can run core operations, mitigate risk of international data exposure, and prevent bad actors from accessing data across finance, supply chain, and procurement lines of business.

Compliance to government and

industry-specific regulations. SAP NS2 ensures all resources, data, and internal operations comply with U.S. regulations to safeguard mission-critical information. Adopt solutions that comply with National Institute of Standards and Technology (NIST) 800-53, International Traffic in

Arms Regulations (ITAR), FedRAMP®, and FedRAMP+ Impact Level 5 (IL5). We leverage tools such as advanced threat analytics, automated compliance validation, vulnerability scanning, intrusion detection, and continuous monitoring to ensure procurement processes stay protected under an automated security model.

SAP expertise paired with decades of security knowledge.

SAP NS2 provides a team of dedicated, U.S.-based, and vetted personnel that are there to support your business objectives. Through deep industry and regional compliance knowledge, SAP NS2 experts support integration with SAP's broader secure cloud modernization strategy, including business AI and mission-focused digital transformation initiatives.

Address complex operational challenges with modern ERP

SAP S/4HANA Cloud Private Edition is an intelligent ERP suite that provides the latest innovations and cloud value while allowing agencies to retain investments by converting existing systems over time. SAP S/4HANA Cloud Private Edition brings to the following main benefits:

Simplify cloud ERP management

Reduce the burden and cost of managing infrastructure and applications with a fully supported SaaS model that helps organizations focus on business operations while maintaining security and compliance.

Ease cloud adoption barriers

Deploy solutions in a securely managed environment tailored to highly regulated agencies. The adoption of cloud applications are supported by enhanced data security, minimal system downtime, and comprehensive service level agreements (SLA).

Gain the full potential of cloud ERP

Extend your cloud ERP with AI, automation, and integration, empowering you to innovate faster.

Turn data into decisions

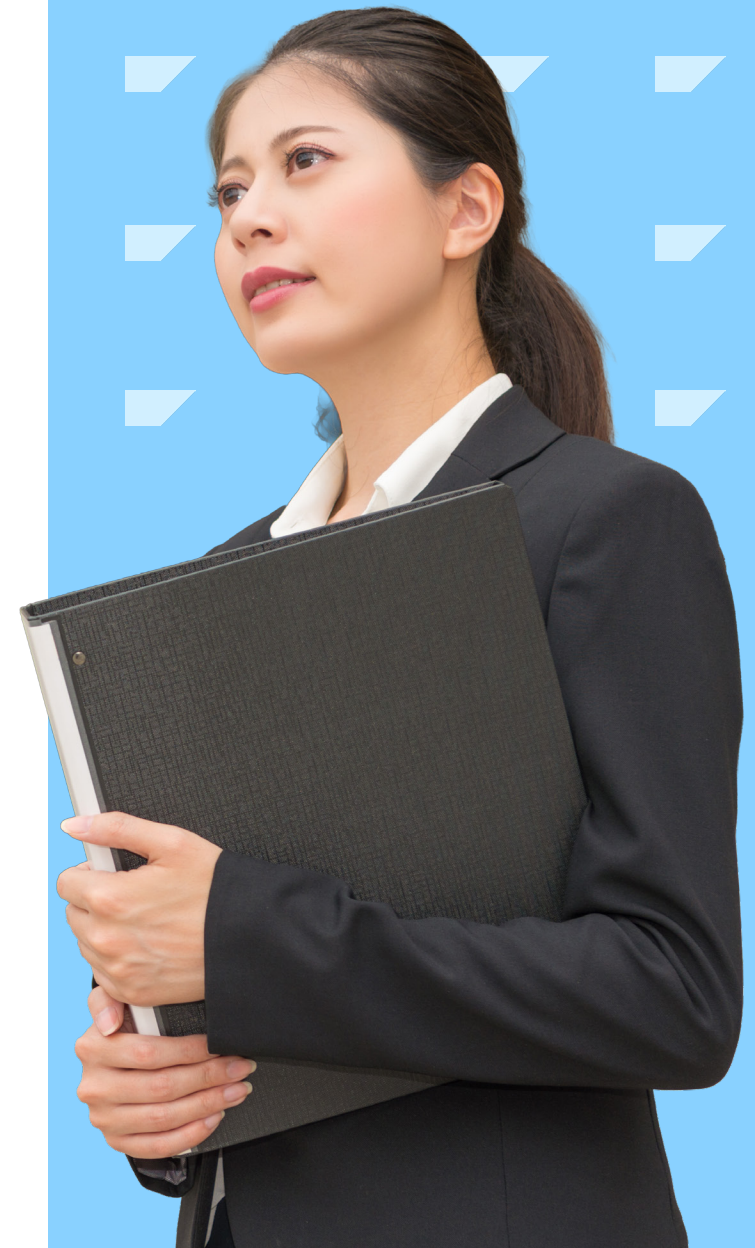

Gain real-time visibility with integrated data and analytics in your cloud ERP, to uncover insights, optimize performance, and make confident business decisions.

Improve operational efficiency

Automate and standardize core business processes to reduce manual work, improve consistency, and help teams operate more efficiently.

Modernize disjointed operations

Replace disconnected processes with integrated ERP capabilities that help organizations streamline operations and adapt to evolving business needs.

Connected, adaptive, and trusted

Transform operations with a modern ERP foundation

SAP S/4HANA Cloud Private Edition helps organizations modernize core business processes, improve visibility across operations, and create a foundation for continuous innovation. By unifying data, automating workflows, and delivering real-time insights, organizations can operate more efficiently, make informed decisions faster, and adapt to changing requirements with confidence.

When deployed by the SAP NS2 Government Cloud, customers gain access to SAP solutions delivered by U.S. citizens on U.S. soil within environments designed to support the unique security, compliance, and operational requirements of regulated organizations.

Expected outcomes

- ✦ Improve enterprise-wide visibility and decision-making
- ✦ Streamline and automate critical business processes
- ✦ Modernize legacy ERP environments
- ✦ Increase operational efficiency and organizational agility
- ✦ Enable future innovation with AI, analytics, and automation
