SAP National Security Services

SAP National Security Services (SAP NS2®) is an independent, U.S. subsidiary of SAP that delivers SAP solutions and AI capabilities exclusively with U.S. citizens operating on U.S. soil. As a CMMC Level 2 certified organization, SAP NS2 is dedicated to supporting customers across the U.S. Federal Government, Department of War, Defense Industrial Base, and Intelligence Community.

The SAP NS2 Government Cloud is aligned with ITAR, GovRAMP, FedRAMP, and DISA Impact Levels. With capabilities spanning unclassified, classified, Secret, and Top Secret levels, we ensure control, accountability, and protection for our customer's mission-critical data.

By bridging the gap between security and innovation, SAP NS2 empowers agencies to drive efficiency, operational performance, and modernization without compromising trust.

SAP Ariba Procurement solutions overview

Intelligent spend management: SAP Ariba Procurement solutions

SAP Ariba Procurement solutions are cloud-based procurement management solutions that link spend categories, integrate intelligent technology, and automate complex workflows so that employees can more easily search for goods and services, collaborate with suppliers, and manage approvals and invoices.

SAP Supplier Lifecycle and Performance Management: A unified and comprehensive view of your most important supplier information can help your business work with suppliers effectively to withstand disruption. Transform supplier management and enable better buying decisions with intelligent tools that keep you in control. The solution provides tools to onboard, qualify, segment, and manage suppliers; automate and streamline supplier management; and align closely with procurement on consistent supplier data.

SAP Supplier Risk: With risk due diligence in your source-to-pay process, you can mitigate disruption while protecting revenue and reputation. Data transparency that reflects supplier risk is key to keeping your supply chain moving as the threat of disruption grows. Proactive, ongoing monitoring and risk due diligence can inform your source-to-pay decisions to enable greater agility and resilience. This solution can help you simplify your supplier management process, provide actionable insight into high-risk suppliers, and use focused risk alerts and third-party risk assessments to evaluate and mitigate risk exposure.

SAP Ariba Sourcing: With margins under pressure, keeping control of costs is key. By streamlining access to a global network of suppliers and increasing spend visibility, you can speed up your sourcing cycles, adapt to evolving organizational needs, and discover valuable savings opportunities. This solution helps you manage spend more strategically, achieve new savings and select qualified suppliers from a broad supplier network while automating, streamlining, and tracking sourcing activities.

SAP Ariba Contracts: Fast and paper-free contract management is possible. Start saving time and money with centralized storage and automation. This solution creates a single integrated view of contract data and standardizes related processes, helping your business realize negotiated savings, identify opportunities, pinpoint leakages, and more.

Cloud innovation for security-sensitive organizations

Adopt SAP spend management solutions to streamline processes, improve efficiency, and achieve operational success all while complying with U.S. regulatory requirements.

SAP Ariba Procurement solutions overview

Intelligent spend management: SAP Ariba Procurement solutions

SAP Ariba Buying & Invoicing: With advanced tools to automate manual processes and support close collaboration with suppliers, the SAP Ariba Buying and Invoicing solution can help you streamline procure-to-pay processes across your organization. This user-friendly, cloud-based solution can help you make procurement faster, reduce errors, boost productivity, and cut costs for a rapid ROI.

SAP Ariba Catalogs: Buying can be a pleasure with consumer-like shopping and a sophisticated procurement process that makes it easy for employees to purchase from your preferred suppliers. This solution, you can provide employees with relevant and current procurement catalog content while you monitor content quality with at-a-glance dashboard reports.

SAP Ariba Buying: An automated and guided experience helps employees complete their purchases with a little browsing and just a few clicks. This solution delivers an improved user experience designed to promote compliance, enabling increased efficiency and transparency throughout the procure-to-order process. It eliminates manual and paper-based transactional processing to reduce costs and increase both accuracy and efficiency.

SAP Ariba Invoice Management: Buying and invoicing is increasingly integrated and collaborative. You can keep pace by digitalizing and automating invoice management over a global business network. This delivers visibility and efficiency to capture more early-payment discounts and optimize working capital. This solution can help you take the complexity out of your invoice-to-pay process and get to ok-to-pay with as little human intervention as possible.

SAP Ariba Contract Invoicing: Infuse speed, efficiency, resiliency, and visibility across and at all levels in contract-based invoicing. This solution creates invoices based on the contracts you have with them. Deliver stronger compliance with contracts and purchase orders while meeting global regulatory requirements in virtually every country and currency.

Cloud innovation for security-sensitive organizations

Adopt SAP spend management solutions to streamline processes, improve efficiency, and achieve operational success all while complying with U.S. regulatory requirements.

100% support
from trusted U.S. citizens,
isolated on U.S. soil,
within secure U.S. regions.

Powered by SAP. Secured by SAP NS2.

The SAP Ariba Procurement solutions deployed through SAP NS2 combine procurement and supply chain processes with extensive practices dedicated to **data security, data access, and data residency**. The innovation, functionality, and services meet the same standards as SAP commercial, but SAP NS2 brings extended value regarding how the solution is protected and managed within the U.S.

U.S. workforce operating entirely on U.S. soil. The SAP NS2 workforce is comprised of U.S. citizens, solely located on U.S. soil. Our security model provides in-country support across all touch points and deployment on local, government-attested cloud infrastructure. Organizations can connect with suppliers, protect mission-critical data, such as supplier organization and bill-of-materials details, and mitigate international exposure and risk.

Compliance to government and industry-specific regulations. SAP NS2 ensures all resources, data, and internal operations comply with U.S. regulations to safeguard supplier collaboration and planning information. Adopt solutions that comply with National Institute of Standards and Technology (NIST) 800-53, International Traffic in Arms Regulations (ITAR), FedRAMP®, and

Defense Federal Acquisition Regulation Supplement (DFARS). We leverage tools such as advanced threat analytics, automated compliance validation, vulnerability scanning, intrusion detection, and continuous monitoring to ensure procurement processes stay protected under an automated security model.

SAP expertise paired with decades of security knowledge. SAP NS2 provides a team of dedicated, U.S.-based, and vetted personnel that are there to support your business objectives. Through deep industry and regional compliance knowledge, SAP NS2 experts support integration with SAP's broader secure cloud modernization strategy, including business AI and mission-focused digital transformation initiatives.

Gain control and improve supply chain continuity.

Our customers purchase and manufacture goods related to national security across a wide network of contractors and suppliers. SAP Ariba Procurement solutions deployed within the SAP NS2 ecosystem improve the visibility of procurement processes so organizations can securely operate across their extended enterprise.

Standardize procurement with built-in security

Apply consistent security and governance across procurement and sourcing processes to help reduce risk and simplify compliance. Organizations can confidently collaborate with suppliers while maintaining the controls required for highly regulated environments.

Strengthen supplier collaboration

Connect buyers and suppliers through a unified business network that streamlines communication, standardizes processes, and accelerates sourcing. Improved collaboration helps build stronger supplier relationships while increasing efficiency across the procurement lifecycle.

Increase supply chain visibility

Gain a connected view of procurement, sourcing, contracts, and supplier activity to improve transparency across the supply chain. With greater visibility into business processes and data, organizations can make faster, more informed decisions and respond quickly to changing operational needs.

Protect sensitive business data

Safeguard procurement and supplier information with security designed for regulated organizations. Built-in protections help maintain data integrity, support compliance, and enable the secure exchange of information across systems and business partners.

Centralized, efficient, and trusted

Unify the flow of information and connect the systems that ingest and transfer data.

SAP Ariba Procurement solutions are cloud-based, end-to-end products that enable efficiency, cost-savings, and compliant procurement processes. From catalogs and requisitions to purchase orders and invoicing, these solutions support the procurement workflow to reduce fragmentation and compliance risks.

When deployed by SAP NS2 Government Cloud, customers gain access to SAP solutions, delivered by U.S. citizens on U.S. soil and designed to support the unique security and operational requirements of regulated organizations.

Expected outcomes

- ◆ Lower total cost of ownership
- ◆ Automated solution deployment and security management
- ◆ Clear ownership and comprehensive views of the procurement lifecycle
- ◆ Reduced bottlenecks and faster decision making with efficient, automated processes
