SAP NS2 Government Cloud

SAP NS2 Government Cloud Federal:

The cloud dedicated to U.S. federal civilian, defense industrial base, and government-affiliated organizations

Summary

SAP NS2® is an independent, U.S. subsidiary of SAP, delivering SAP solutions and AI capabilities exclusively with U.S. citizens operating on U.S. soil. As a CMMC Level 2 certified organization, all SAP NS2 services and solutions are aligned with ITAR, FedRAMP, and DISA Impact Levels.

SAP NS2 hosts and deploys solutions for highly regulated U.S. organizations within the **SAP NS2 Government Cloud Federal (GCF)**. Designed to support federal civilian agencies, the Defense Industrial Base (DIB), and other government-aligned organizations, SAP NS2 GCF brings together the security and cloud capabilities needed to support our security-sensitive customers. By deploying the SAP cloud portfolio within SAP NS2 GCF, customers can move to the cloud strategically, safely, and effectively while maintaining the security and compliance requirements of their industry.

Overview

SAP NS2 GCF benefits

- Supports a broad portfolio of SAP solutions across finance, supply chain, human capital management, data management, and artificial intelligence
- Industry-leading commercial SAP innovations protected by federally mandated U.S. regulations
- Operations isolated to the U.S.—including data, applications, and infrastructure
- End-to-end support model provided through ongoing management of cloud applications, including incident reporting and access management
- All-in-one deployment model reduces overhead and infrastructure costs, lowers total cost of ownership (TCO), and provides quicker time to value
- 99.5 and 99.9 service level agreements (SLA) to reduce system downtime

SAP NS2 GCF compliance

- NIST SP 800-53 Rev 5
- International Traffic in Arms Regulations (ITAR)
- Export Administration Regulations (EAR)
- FedRAMP® Moderate Baseline Certification
- GovRAMP Authorization
- FedRAMP+ Impact Level 2, Privacy and SRG overlay
- ISO 27001, 27017, 27018
- SOC I Type II, SOC II Type II
- HIPAA Attestation

Value drivers

Centralized monitoring

Continuous integration / continuous delivery

Security information and event management

Centralized anti-malware

Continuous web application scanning

Centralized vulnerability scanning

Centralized intrusion detection system

Centralized log management

SAP NS2 Government Cloud Federal (GCF) hosts and deploys SAP's commercial cloud solutions with enhanced security controls designed to meet the unique needs of U.S. federal civilian agencies, the DIB, critical infrastructure sectors, such as utilities, and other government-aligned organizations.

Built with a focus on protecting FCI (Federal Contract Information), SAP NS2 GCF combines a FedRAMP-certified cloud with dedicated U.S. personnel who bring deep government and industry expertise. SAP NS2 GCF helps organizations protect sensitive data while maintaining rigorous security and compliance requirements.

SAP NS2 GCF includes:

- Daily automated scans of operating systems for detection of malware/malicious threats
- Restriction of users to rules and policies set by the system administrator within operating systems
- Centralized vulnerability management tooling that automatically identifies vulnerabilities before external threats can infiltrate the system
- Uniformed level of security for all federal agencies through compliant web protocols, load balancers, operating systems

Organizations can modernize business processes, strengthen operational resilience, and advance toward an intelligent, sustainable enterprise when they adopt SAP's portfolio of enterprise solutions within the SAP NS2 GCF.
