U.S. aerospace and defense organizations supported by SAP NS2 | PUBLIC

Protect what matters. Drive what's next in mission readiness.

SAP NS2

SAP National Security Services

SAP National Security Services (SAP NS2®) is an independent, U.S. subsidiary of SAP that delivers SAP solutions and AI capabilities exclusively with U.S. citizens operating on U.S. soil. As a CMMC Level 2 certified organization, SAP NS2 is dedicated to supporting customers across the U.S. Federal Government, Department of War, Defense Industrial Base, and Intelligence Community.

The SAP NS2 Government Cloud is aligned with ITAR, GovRAMP, FedRAMP, and DISA Impact Levels. With capabilities spanning unclassified, classified, Secret, and Top Secret levels, we ensure control, accountability, and protection for our customer's mission-critical data.

By bridging the gap between security and innovation, SAP NS2 empowers agencies to drive efficiency, operational performance, and modernization without compromising trust.

SAP NS2 Government Cloud portfolio

Enterprise resource planning
The foundation for modern, mission-ready enterprise operations.

- SAP S/4HANA Cloud Private Edition

AI platform
An enterprise AI foundation that brings together AI, data, process context, and governance.

- SAP Business Data Cloud
- SAP Analytics Cloud
- SAP HANA Cloud
- SAP Business Technology Platform
- SAP AI Core
- SAP AI Launchpad

Human capital management
Workforce management and payroll built for regulated agencies.

- SAP SuccessFactors
- SAP SuccessFactors Employee Central Payroll

Supply chain management
End-to-end supply chain visibility and control.

- SAP Business Network
- SAP Integrated Business Planning
- SAP Mobile Execution and Dynamic Forms

Finance and spend management
Streamlined acquisition and vendor management.

- SAP Ariba Procurement solutions
- SAP Fieldglass

Powered by SAP. Secured by SAP NS2.

SAP NS2 combines modern cloud and AI capabilities with extensive practices dedicated to **data security, data access, and data residency.** The innovation, functionality, and services meet the same standards as SAP commercial, but SAP NS2 brings extended value regarding how solutions are protected and managed within the U.S.

U.S. workforce operating entirely on U.S. soil. The SAP NS2 workforce is comprised solely of U.S. citizens, located on U.S. soil. Our security model provides in-country support across all touch points and deployment on local, government-attested cloud infrastructure. Organizations can run supply chain operations, mitigate risk of international data exposure, and prevent bad actors from accessing critical data.

Compliance to government and industry-specific regulations. SAP NS2 ensures all resources, data, and internal operations comply with U.S. regulations to safeguard operations. Adopt solutions that comply with:

- NIST SP 800-53 Rev 5
- International Traffic in Arms Regulations (ITAR)
- Export Administration Regulations (EAR)
- ISO 27001, 27017, 27018
- SOC I Type II, SOC II Type II
- HIPAA
- GovRAMP
- FedRAMP®
- FedRAMP+ Impact Level 2
- CUI & ECI protections

SAP expertise paired with decades of security knowledge. SAP NS2 provides a team of dedicated, U.S.-based, and vetted personnel that are there to support your business objectives. Through deep industry and regional compliance knowledge, SAP NS2 experts support integration with SAP's broader secure cloud modernization strategy, including business AI and mission-focused digital transformation initiatives.

Cloud and AI for security-sensitive agencies

Find the solutions you need to transform your processes, improve efficiency, and meet your mission while complying with U.S. regulatory requirements.

100% support from trusted U.S. citizens, isolated on U.S. soil, within secure regions.

Successful innovation for aerospace and defense

SAP NS2 helps aerospace and defense organizations embark on a foundational transformation journey. We ensure security and innovation are delivered at the same level, so organizations can effectively manufacture and deploy assets that impact the security of our nation. With SAP NS2 Government Cloud, aerospace and defense organizations can find success.

Accelerated innovation timelines with minimal risk

SAP NS2's ITAR and FedRAMP-based infrastructure aligns with the necessary aerospace and defense mandates to fast-track commercial deployments. Pre-certified alignment with FedRAMP, ITAR, and NIST standards ensures customers stay compliant from adoption to deployment.

Address supply chain disruptions and geopolitical concerts

With friendshoring, nearshoring, and reshoring under strict government mandate, SAP NS2 delivers supply chain solutions that naturally integrate AI-driven insights, allowing organizations to create supply chain resilience and predict what-if scenarios before it's too late.

Enable trusted AI

Bring AI into business processes with governance, transparency, and enterprise controls built into the platform. SAP NS2's flexible digital AI foundation allows organizations to adapt to evolving policies, ensure human-in-the-loop approvals, and securely adopt emerging technologies as they become available.

Reduce complexity between legacy and modern systems

Evolve legacy processes in a phased approach, weave together siloed systems, leverage intelligent technologies, and connect real-world data to create value for the agencies that rely on you.

Compliant, resilient, and mission-ready

How SAP NS2 supports aerospace and defense organizations

Aerospace and defense organizations need governance and foundational modernization. Through the SAP NS2 Government Cloud, we provide an avenue to adopt innovation without compromising security. We strictly control how our cloud portfolio is governed, where it resides, and how data is secured.

This control empowers organizations to benefit from a portfolio that supports all lines of business. Our dedication to data access, data residency, and data security ensures customers can future proof their operations while remaining protected by industry standards.

Key benefits

- Cloud solutions designed to support mission-critical workloads and protect controlled unclassified information (CUI)
- Deployment options with government-grade hyperscalers, such as AWS GovCloud, Azure Government, and Google Cloud Platform Assured Workloads
- All-in-one deployment model to reduce overhead and infrastructure costs, lower total cost of ownership (TCO), and provide quicker time to value
- 99.7 and 99.9 service level agreements (SLA) to reduce system downtime
