Protect what matters. Drive what's next in governance and accountability.

SAP National Security Services

SAP National Security Services (SAP NS2®) is an independent, U.S. subsidiary of SAP that delivers SAP solutions and AI capabilities exclusively with U.S. citizens operating on U.S. soil. As a CMMC Level 2 certified organization, SAP NS2 is dedicated to supporting customers across the U.S. Federal Government, Department of War, Defense Industrial Base, and Intelligence Community.

The SAP NS2 Government Cloud is aligned with ITAR, GovRAMP, FedRAMP, and DISA Impact Levels. With capabilities spanning unclassified, classified, Secret, and Top Secret levels, we ensure control, accountability, and protection for our customer's mission-critical data.

By bridging the gap between security and innovation, SAP NS2 empowers agencies to drive efficiency, operational performance, and modernization without compromising trust.

SAP NS2 Government Cloud portfolio

Enterprise resource planning
The foundation for modern, mission-ready enterprise operations.

- SAP S/4HANA Cloud Private Edition

AI platform
An enterprise AI foundation that brings together AI, data, process context, and governance.

- SAP Business Data Cloud
- SAP Analytics Cloud
- SAP HANA Cloud
- SAP Business Technology Platform
- SAP AI Core
- SAP AI Launchpad

Human capital management
Workforce management and payroll built for regulated organizations.

- SAP SuccessFactors
- SAP SuccessFactors Employee Central Payroll

Supply chain management
End-to-end supply chain visibility and control.

- SAP Business Network
- SAP Integrated Business Planning
- SAP Mobile Execution and Dynamic Forms

Finance and spend management
Streamlined acquisition and vendor management.

- SAP Ariba Procurement solutions
- SAP Fieldglass

- Centralized monitoring
- Continuous integration / continuous delivery
- Security information and event management
- Centralized anti-malware
- Continuous web application scanning
- Centralized vulnerability scanning
- Centralized intrusion detection system
- Centralized log management

Powered by SAP. Secured by SAP NS2.

SAP NS2 combines modern cloud and AI capabilities with extensive practices dedicated to **data security, data access, and data residency.** The innovation, functionality, and services meet the same standards as SAP commercial, but SAP NS2 brings extended value regarding how solutions are protected and managed within the U.S.

U.S. workforce operating entirely on U.S. soil. The SAP NS2 workforce is comprised solely of U.S. citizens, located on U.S. soil. Our security model provides in-country support across all touch points and deployment on local, government-attested cloud infrastructure. Organizations can run operations, mitigate risk of data exposure, and prevent bad actors from accessing mission-critical data across lines of business.

Compliance to government and industry-specific regulations. SAP NS2 ensures all resources, data, and internal operations comply with U.S. regulations to safeguard operations. Adopt solutions that comply with:

- NIST SP 800-53 Rev 5
- International Traffic in Arms Regulations (ITAR)
- Export Administration Regulations (EAR)
- ISO 27001, 27017, 27018
- SOC I Type II, SOC II Type II
- HIPAA
- GovRAMP
- FedRAMP®
- FedRAMP+ Impact Level 2
- CUI & ECI protections

SAP expertise paired with decades of security knowledge. SAP NS2 provides a team of dedicated, U.S.-based, and vetted personnel that are there to support your business objectives. Through deep industry and regional compliance knowledge, SAP NS2 experts support integration with SAP's broader secure cloud modernization strategy, including business AI and mission-focused digital transformation initiatives.

Cloud and AI for security-sensitive organizations

Find the solutions you need to transform your processes, improve efficiency, and modernize operations while complying with U.S. regulatory requirements.

100% support from trusted U.S. citizens, isolated on U.S. soil, within secure regions.

Achieving digital transformation for state and local governments

State and local governments need solutions that support automation, reduce fragmentation, and improve accountability and transparency. SAP NS2 helps meet and exceed these challenges so customers can find success.

Accelerated innovation timelines with minimal risk

SAP NS2's FedRAMP-based infrastructure aligns with the necessary federal mandates to fast-track commercial deployments. Agencies can adopt modern solutions, bypass common security hurdles, and gain quicker ROI and reduced legacy system maintenance.

Improve inefficiencies and fragmentation

Make room for innovation by incrementally replacing legacy systems. Choose solutions that best align to mission priorities using a non-disruptive modernization path, instead of replacing everything at once. New capabilities can run in parallel with legacy systems, while integrating with existing enterprise investments.

Adopt governance-ready, purpose-built, auditable AI

Bring AI into business processes with governance, transparency, and enterprise controls built into the platform. SAP NS2's flexible digital AI foundation allows agencies to improve citizen services, streamline benefits processing, and speed up permitting without added risk.

Break down silos and duplicative efforts

Adopt ERP and data management solutions that promote workflow integration across all lines of business. Leaders gain a unified view of data, eliminating silos and allowing leaders to make decisions that reduce isolation, create shared accountability, and encourage cross-functional collaboration.

Trusted, governed, and accountable

How SAP NS2 supports state and local governments

Through the SAP NS2 Government Cloud, we provide agencies an avenue to adopt innovation without compromising security. We strictly control how our cloud portfolio is governed, where it resides, and how data is secured.

This control empowers agencies to benefit from a portfolio that supports all lines of business. Our dedication to data access, data residency, and data security ensures customers can future proof their operations while remaining protected by industry standards.

Key benefits

- Cloud solutions designed to support mission-critical workloads and protect mission-critical data including FCI, CUI, and PII
- Deployment options with government-grade hyperscalers, such as AWS GovCloud, Azure Government, and Google Cloud Platform
- All-in-one deployment model to reduce overhead and infrastructure costs, lower total cost of ownership (TCO), and provide quicker time to value
- 99.5 and 99.9 service level agreements (SLA) to reduce system downtime
