# Mission Success

## Tailored for Today, and Tomorrow

### Powerful solutions that are modified for the mission

No two missions are alike. SAP NS2 understands this and can extend the power and performance of SAP software to fit your unique mission needs and parameters.

Over the past decade, SAP NS2 has supported a wide range of national security missions with our in-depth knowledge of the community and our progressive technology. Furthering our commitment, we've created NS2 Innovative Business Solutions (IBS), a critical accelerator that uses an agile, end-to-end design-driven approach to enhance your current software investment, migrate legacy software to the cloud, or prototype a next-generation solution.

Each IBS solution is backed by the same support and commitment that comes with commercial SAP software. The result is a mission-tailored, SAP NS2 solution that empowers your agency to address its most pressing mission-critical needs, today, tomorrow and into the future.

## Objectives

- Deliver mission-tailored solutions with next generation technology like predictive analytics, IoT, and machine language.
- Extend your current commercial SAP software investment to meet shifting mission objectives.
- Ensure long term success whether on premises, private cloud or NS2 Secure Cloud.

## Solutions

- Tailored application development by SAP's own product engineering experts.
- Proven execution performed by trusted experts who understand your mission needs.
- Commercial grade software innovation, maintenance, and support 24 hours a day.
- 100% U.S. based, SAP NS2 personnel, infrastructure and cloud operations centers.

## Benefits

- Risk-free transformation of legacy platforms into state-of-the-art mission-centric solutions
- Agile, innovative development approach that quickly delivers operational capability.
- Streamlined user experiences and seamlessly integrated solutions.

Swiftly adjust to changing mission requirements. Rethink processes and simplify workflows. Create precision outcomes by increasing speed to insight, eliminating stovepipes, and powering informed decisions. Leverage your existing solutions to rapidly deliver new capabilities. And do it all with commercial-grade solutions that are tailored for your mission by SAP NS2 Innovative Business Solutions, a trusted national security provider.

We combine more than 45 years of SAP enterprise application development experience with in-depth knowledge of national security challenges to solve your toughest problems.

Inline and leverage machine learning, predictive analytics, the Internet of Things, and other leading-edge technology in the manner that best suits the mission. Our U.S.-based commercial-grade development teams rapidly develop, deploy, and maintain each solution in a fully operational environment, 24x7x365.

In the cloud, on-premises, or in hybrid environments, you can innovate faster with mission enhancing solutions that integrate with your agency core processes.

### Turn Thinking Into Everything

At SAP NS2® we do one thing: support the mission of national security. We do this by accelerating the deployment of commercially proven technology to deliver optimal outcomes at mission speed.

SAP NS2 is a US subsidiary of SAP, a global leader in software development and innovation. SAP spends $3.5 billion annually in Research and Development (R&D), which allows SAP NS2 to bring tremendous technology and innovation in support of our U.S. Department of Defense and National Security customers. By leveraging commercially proven technologies backed by the expertise of credentialed U.S. persons on U.S. soil, we accelerate the pace of innovation for the mission.
