SAP HANA® Cloud

Delivering Mission Innovation so that our customers run at their best.

Enterprise-scale architecture with built-in services to assist in the planning, building, and operation of applications.

WHAT

SAP NS2® provides a comprehensive, enterprise-scale cloud, including a unique combination of software, services, and infrastructure that will give your organization the optimal performance and agility for critical applications. SAP NS2 delivers SAP® cloud solutions with the compliance and security requirements demanded by U.S. federal, defense, aerospace, and critical infrastructure companies.

WHY

The SAP NS2 Cloud® – Secure SAP HANA® Cloud is a comprehensive offering designed to support your system workloads leveraging a cloud hyperscaler. Our solution allows you to run your SAP and non SAP applications in the cloud while providing scalable computing capacity deriving from the hyperscaler. The NS2 Cloud provides a seamless strategy for establishing your virtual servers and helping to configure the required security, networking and managed storage requirements.

Your production workloads can be secured, enhanced, and better supported while providing you the most comprehensive coverage across your solution landscape.

SAP NS2: Secure SAP HANA® Cloud

The SAP NS2 Cloud® – Secure SAP HANA® Cloud (SHC) is agile and allows you to migrate your SAP workloads or SAP HANA-based applications to the cloud or quickly create a test environment to drive innovation. Your SAP NS2 Cloud® resources are U.S. citizens located within the United States to better accommodate your security requirements. SAP NS2's approach is unique in the industry and allows organizations with specific security and compliance requirements to easily transition to the cloud. Our cloud offers an enterprise-scale architecture with built-in services to assist in the planning, building, and operation of applications in a secured and private managed cloud.

The SAP NS2 Cloud® gives our customers the flexibility to architect secure cloud solutions that comply with the FedRAMP High baseline, the DOJ's Criminal Justice Information Systems (CJIS) Security Policy, U.S. International Traffic in Arms Regulations (ITAR), Export Administration Regulations (EAR), Department of Defense (DoD) Cloud Computing Security Requirements Guide (SRG) for Impact Levels 2, 4 and 5, FIPS 140-2, IRS-1075, and other compliance regimes. The NS2 Cloud can help customers achieve their objectives along with the flexibility and elasticity required to be successful and secure.

SHORT SUMMARY

In summary, the SAP NS2 Cloud® provides organizations the ability to leverage the benefits of cloud and optimize your SAP® investments with the least disruption and greatest impact. Your production workloads can be secured, enhanced, and better supported while providing you the most comprehensive coverage across your solution landscape. We will support you in this transition to the secure cloud and also make your mission and data our priority.
